

Press Release April 2009

RohnerChem renews cGMP compliance status after successful Swissmedic inspection

RohnerChem renews its manufacturing license for pharmaceutical API's following a successful inspection by Swissmedic, the Swiss health authority. The license is valid until 2014. The inspection confirms RohnerChem's continued compliance with current Good Manufacturing Practices and underscores the company's commitment to the highest standards of quality. RohnerChem was also successfully inspected by the FDA in 2007 and maintains its status as an approved API supplier for the US market.

RohnerChem focuses on custom synthesis for speciality and fine chemicals and the life science industry. We offer manufacturing of Advanced Intermediates and APIs on an exclusive basis for customers in the pharmaceutical industry. All laboratory and large scale manufacturing is carried out according to ISO and, as needed, to cGMP standards. RohnerChem provides fast and cost efficient technology transfer into its complex multi-purpose plants in short time-frames and is therefore an ideal manufacturing partner.
